

### Under Construction & 404 Hole – Read Me

First of all, thanks for buying one of my graphic files! I appreciate this and I would love to help you with your purchase. Underneath this intro text I will explain how to alter some of the parts of your purchase. I hope it will help you, and ofcourse, good luck!

---

1. **Open the file** UnderConstruction.psd from the PSD Files folder in Adobe Photoshop CS or higher.
2. **To change the color** unhide the wanted color in the Background Colors folder.
3. To change the color of any vector shape (everything is vector shaped in this file) double click any fill color, and change it!
4. Everything is customizable
5. Also, there is a **skeleton character hidden** in the Gap Sides Shadow folder!
6. You could also turn on/off Text layers **as 404 or/and We have to fix this file**, or change the text yourself!
7. Awesome for any wallpaper or website!

**Don't forget to give me a rating for the file! And stay tuned for updates in the symbol libraries!**
